## To whomever it may concern

Greetings,

I am a **civil engineer** with 9 years of experience in India & Sri Lanka. I have moved to the UK last October and hold a valid visa to work. As a candidate who is experienced in the responsibilities associated with this role, I believe that I will perform effectively and go beyond the expectations listed in the job description.

I also have a bachelors degree in Mechanical Engineering from Coventry University.

While working at my previous company as a **project engineer** I developed my expertise in **organizational management**, **site management** and **project management**. While growing these skills, I stood out due to my **interpersonal skills** and **problem solving** nature. I successfully evolved into a **valuable** professional. My objective is to further apply these abilities as an **Engineer**, while simultaneously learning new capabilities within the area of **Construction and Management**.

After reviewing my personal profile and resume, I hope that you are able to observe my qualifications and my potential as a candidate for this role. I am excited to further elaborate on how my specific skills and professional experiences will benefit your organization. Please contact me to organize a convenient meeting date and time. If you need any additional information or would like references from my past employers, do not hesitate to get in contact with me. Thank you for your time and consideration.

*Yours sincerely*

**INDUSHAN SUTHAGARAN**
