# PENNEL Florian

## SKILLS

- **Autonomy and perseverance** : Which I acquired following the competitive examination for medicine (during 2 years) then my studies at the epf (since 3 years). Or since a robotic race project.
- **A spirit of research and scientific approach** : A mind that I made grow during the various scientific courses and practical work. As an Article research project.
- **Organisation** : a skill that I acquired thanks to the numerous projects during my studies, in which I was often a project manager, particularly in project management where I managed a group of 20 students.
- **Team spirit** : which I developed through playing team sports like handball and doing a lot of teamworks in scholar project.

## PROFESSIONAL EXPERIENCE

### Discovery internship in the Civil Construction in 2021

- With PGL 45, an internship in the field of the civil construction
- Monitoring of work completion
- This gave me knowledge of how the construction sector works

### Worker internship in 2022

- Work placement at zéfai, a company in the industrial sector
- This allowed me to understand the problems that workers encounter

### Humanitarian internship in 2023

- volunteered for 1 month at the Loiret food bank
- It brought me empathy towards others and strengthened my collective spirit
