For the attention of the recruitment department,

I would like to apply for the position of Architectural Designer that you recently advertised on [www.storyhomes.co.uk](http://www.storyhomes.co.uk). I am an Architectural Technician with several years' experience working within the construction industry and have a broad range of experience covering different materials and construction types; for both short-term and long-term projects.

After viewing the job advertisement I was intrigued to find out more about your company. I have since looked at your website and was impressed with the examples of work that are displayed and also the rounded – complete package - you are able to offer to your clients .

I am passionate about design and I am confident that my enthusiasm in this area along with my technical experience would make me a suitable candidate for the position.

One achievement I consider most appropriate to display my commitment and dedication to design and construction is the renovation of a Grade II listed Church in Cumbria. This included submitting planning and building regulations applications and co-ordinating, as project leader, with several different organisations involved in authorising and phasing in the construction. My enclosed CV displays this and various other projects in more detail.

I look forward to hearing from you in the near future.

Yours sincerely,

Alex Karanikolas
