Full

DATE OF BIRTH

04/09/2005

## Skills

Problem Solving  
Determination  
Discipline  
Organisation  
Versatility

## Profile

I am a hard working student looking to embark on a fantastic opportunity to continue my development within the engineering sector. I am a hands on individual, which can be seen through the part time job that I have carried out whilst I have been at college, as I enjoy working with various tools to solve potential problems within the work place. Whilst I gravitate towards the practical side of things, I've worked hard to focus on the development of my academic subjects, in particular, my maths and science skills and I now feel confident in these areas of study to be able to apply them in real life situations. My strongest skills are my attention to detail and discipline skills, I like to focus on a project and ensure I'm covering all bases.

## Employment History

### Construction Labourer , Linear Construction , Bolton

MARCH 2023 – PRESENT

This is a role that I carried out alongside my college course. This was originally to gain some work experience to go towards my course but the employer decided to keep me on in a part time role as I suited the role so well.

## Education
